

THORNBURG INTERNATIONAL GROWTH FUND

Fact Sheet | 30 June 2022

INVESTMENT OBJECTIVE

The Fund's goal is to provide investors with long-term growth of capital by investing in equity securities selected for their growth potential.

INVESTMENT APPROACH

The Fund uses fundamental, bottom-up analysis to uncover companies with robust, high-quality business models and durable growth prospects across geographies and sectors. Our unique three-basket approach to security selection provides diversification across the style spectrum while balancing risk exposures. Ultimately, this high-conviction, active portfolio seeks to outperform its benchmark with less risk over a full market cycle.

Important Information

† Holdings are classified by country of risk as determined by MSCI and Bloomberg.

Investments carry risks, including possible loss of principal. Additional risks may be associated with investments outside the United States, especially in emerging markets, including currency fluctuations, illiquidity, volatility, and political and economic risks. Investments in small- and mid-capitalization companies may increase the risk of greater price fluctuations. Investments in the Fund are not FDIC insured, nor are they bank deposits or guaranteed by a bank or any entity.

Class I shares may not be available to all investors. Minimum investments for the I share class may be higher than those for other classes. Class R shares are limited to retirement platforms only.

There is no guarantee that the Fund will meet its objectives. Portfolio attributes and holdings can and do vary. Charts may not add up to 100% due to rounding.

To determine a fund's Morningstar Rating™, funds and other managed products with at least a three-year history are ranked in their categories by their Morningstar Risk-Adjusted Return scores. The top 10% receive 5 stars; the next 22.5%, 4 stars; the middle 35%, 3 stars; the next 22.5%, 2 stars; and the bottom 10% receive 1 star. The Risk-Adjusted Return accounts for variation in a managed product's monthly excess performance (excluding sales charges), placing more emphasis on downward variations and rewarding consistent performance. Other share classes may have different performance characteristics. © 2021 Morningstar, Inc. All Rights Reserved. Beta is a measure of market-related risk. Less than one means the portfolio is less volatile than the index, while greater than one indicates more volatility than the index.

The The MSCI ACWI ex-USA Net Total Return USD Index is a market capitalization weighted index representative of the market structure of 46 developed and emerging market countries in North and South America, Europe, Africa, the Middle East, and the Pacific Rim, excluding securities of United States issuers. The index is calculated with net dividends reinvested in U.S. dollars.

Indices do not take into account fees and expenses. Investors cannot make direct investments in an index.

Consistent Growers: generally exhibit steady earnings and revenue growth, often with subscription or other recurring revenue profiles. These firms tend to buoy the portfolio in weak markets.

Emerging Growth Companies: are often addressing a new market or carving out a niche in an existing market. Companies in this basket tend to be smaller, earlier-stage companies.

Successful emerging growth companies are often reclassified as their businesses mature.

Growth Industry Leaders: often have leadership positions in growing markets. These firms tend to be larger, more established, and have dominant market share.
