

THORNBURG STRATEGIC MUNICIPAL INCOME FUND

Fact Sheet | 30 June 2022

INVESTMENT OBJECTIVE

The investment goal of the fund is to provide investors with a high level of current income exempt from federal individual income tax.

INVESTMENT APPROACH

The fund is an actively managed diversified portfolio of municipal bonds. The investment team aims to match municipal market structure and deal flow through a relative value framework that operates across geography, sectors, issuers and revenue streams. Operating as generalists, team members participate in all key aspects of investment management: credit research, trading, portfolio construction and risk oversight.

CREDIT QUALITY RATINGS (%)

(percent of fixed income)

A bond credit rating assesses the financial ability of a debt issuer to make timely payments of principal and interest. Ratings of AAA (the highest), AA, A, and BBB are investment-grade quality. Ratings of BB, B, CCC, CC, C and D (the lowest) are considered below investment grade, speculative grade, or junk bonds. Credit quality ratings use the highest rating available from either S&P Global Ratings or Moody's Investors Service. Where neither rating is available, we have used ratings from other nationally recognized statistical rating organizations (NRSROs). May not add up to 100% due to rounding.

Important Information

Investments carry risks, including possible loss of principal. Portfolios investing in bonds have the same interest rate, inflation, and credit risks that are associated with the underlying bonds. The value of bonds will fluctuate relative to changes in interest rates, decreasing when interest rates rise. Unlike bonds, bond funds have ongoing fees and expenses. Investments in the Fund are not FDIC insured, nor are they bank deposits or guaranteed by a bank or any entity.

Income earned from municipal bonds is exempt from regular federal and in some cases, state and local income tax. Income may be subject to the alternative minimum tax (AMT).

Class I shares may not be available to all investors. Minimum investments for the I share class may be higher than those for other classes.

Diversification does not assure or guarantee better performance and cannot eliminate the risk of investment losses.

The ICE BofA U.S. Municipal Securities Index tracks the performance of the investment-grade U.S. tax-exempt bond market. Qualifying bonds must have at least one year remaining term to maturity, a fixed coupon schedule, and an investment grade rating (based on average of Moody's, S&P, and Fitch).

Indices do not take into account fees and expenses. Investors cannot make direct investments in an index.

To determine a fund's Morningstar Rating™, funds and other managed products with at least a three-year history are ranked in their categories by their Morningstar Risk-Adjusted Return scores. The top 10% receive 5 stars; the next 22.5%, 4 stars; the middle 35%, 3 stars; the next 22.5%, 2 stars; and the bottom 10% receive 1 star. The Risk-Adjusted Return accounts for variation in a managed product's monthly excess performance (excluding sales charges), placing more emphasis on downward variations and rewarding consistent performance. Other share classes may have different performance characteristics. © 2022 Morningstar, Inc. All Rights Reserved. Effective Duration – A bond's sensitivity to interest rates, incorporating the embedded option features, such as call provisions. Bonds with longer durations experience greater price volatility than bonds with shorter durations.

Average Effective Maturity – Weighted average of the effective maturities of the bonds in a portfolio. Effective maturity incorporates the embedded option features of the bond, such as prepayments, call and put options.

Average price is the mean price of an asset or security observed over some period of time. It is calculated by finding the simple arithmetic average of closing prices over a specified time period.
